Please find below and/or attached an Office communication concerning this application or proceeding.

AO

Office Action Summary

Application No.

09/378,201

Applicant(s)

HO ET AL.

Examiner

Shick C Hom

Art Unit

2661

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 September 2001.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-19 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 19 is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Art Unit:

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 9/28/01 have been fully considered but they are not persuasive.

In page 10 line 26 to page 11 line 5, and page 11 lines 26-28, applicant argued that Allen, Jr. et al. do not disclose encapsulating data into IP packets and transporting the IP packets as in claims 1 and 17 is not persuasive. Allen, Jr. et al. in col. 16 line 55 to col. 17 line 8 which recite converting ATM data to IP packets and the Internet service providers transporting IP packets to the Internet user via the dial up modem clearly anticipate encapsulating data into IP packets and transporting IP packets.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Art Unit:

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

4. Claims 1, 6-7, 10-11, and 17-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Allen, Jr. et al.

Allen, Jr. et al. disclose all the subject matter now claimed. Note col. 6 lines 43-50 which recite the method for transporting voice data from an originating location to a destination whereby the transporting is enabled by emulating a circuit by employing a circuit emulation service CES wherein the voice data is converted to ATM cells utilizing ATM adaptation layer 1 AAL1 or ATM adaptation layer 2 AAL2 and col. 16 line 55 to col. 17 line 8 which recite that the invention also applies to Internet services providers whereby the Internet user typically accesses the Internet by connecting to the Internet service provider via a dial up modem; however, unlike a voice connection, a modem connection carries bursty data with Internet Protocol IP

Art Unit:

packets clearly anticipate the method including the step of configuring a circuit emulation service CES over an internet protocol IP network and the step of transporting the IP packets from a local interworking function to a remote interworking function according to the CES as in claims 1, 17, and 18. Col. 16 line 55 to col. 17 line 8 which recite converting ATM data to IP packets and the Internet service providers transporting IP packets to the Internet user via the dial up modem and col. 10 line 64 to col. 11 line 5 which recite the AAL1 or AAL2 allow the choice of carrying voice trunks through an ATM network as constant bit rate traffic or variable bit rate traffic and that if voice is sent as constant bit rate traffic, then ATM Forum's structured DS1 nx64 Kbps circulation emulation service using AAL1 is employed and if voice is sent as real time variable bit rate traffic, then AAL2 as the ATM adaptation layer is employed, thus taking advantage of the many efficiency and performance enhancing features supported by AAL2 clearly anticipate encapsulating data at a constant bit rate at the local interworking function into IP packets and transporting IP packets as in claims 1, 17, and 18. Col. 6 lines 3-22 which recite the use of a centralized control and signaling interworking function CS-IWF device for performing call control functions and using AAL2 to support silence suppression and/or voice compression clearly anticipate

Art Unit:

exchanging CES control protocol information between the local and remote interworking function as in claim 6 and including the compression option as in claim 7. Col. 14 lines 19-40 which recite the step of buffering to accommodate cell delay variation introduced by the network and cell construction delay clearly anticipate the step of buffering IP packets for at least as long as the maximum delay variation as in claims 10-11.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly

Art Unit:

owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 2, 8-9 and 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Allen, Jr. et al as applied to claim 1 above, and further in view of Rogers et al.

Allen, Jr. et al. did not recite attaching a CES header comprising a version number to each IP packet as in claims 8-9, the circuit header comprising at least a circuit identification, a flag field, sequence number, octet padding values and a data field as in claims 12-13, and the maximum delay variation as in claim 2.

Rogers et al. teach that it is known to provide the step of traffic shaping for altering the traffic characteristics of a stream of cells on a VCC or a VPC to achieve a desired modification of those traffic characteristics, in order to achieve better network efficiency whilst meeting the QoS objectives or to ensure conformance at a subsequent interface whereby traffic shaping maintains cell sequence integrity on the connection as set forth at col. 3 lines 31-40 and FIG. 2 which

Art Unit:

shows the connection parameters written into the cell header in the field of digital and multiplex communications clearly anticipate the CES header comprising the version number to each IP packet, the circuit identification, the flag field, sequence number, octet padding values and data field as in claims 8-9 and 12-13. Col. 1 lines 48-57 which recite means for providing bounded packet delay variation (commonly referred to as cell delay variation) which clearly anticipate the maximum delay variation as in claim 2.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the CES header comprising the version number to each IP packet, the circuit identification, the flag field, sequence number, octet padding values and data field as taught by Rogers et al. to the system of Allen, Jr. et al. because Rogers et al. teach the desirable advantage of achieving better network efficiency whilst meeting the QoS objectives and ensure conformance at a subsequent interface and said better network efficiency being desirable to achieve efficient system operation in Allen, Jr. et al.

Art Unit:

Allowable Subject Matter

7. Claims 3-5 and 14-16 would be allowable if rewritten to include all of the limitations of the base claim and any intervening claims.

8. Claim 19 is allowed.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Art Unit:

10. **Any response to this final action should be mailed to:**

Box AF

Commissioner of Patents and Trademarks
Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for formal communications; please
mark "EXPEDITED PROCEDURE")

Or:

(for informal or draft communications, please
label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal
Park II, 2121 Crystal Drive, Arlington. VA., Sixth
Floor (Receptionist).

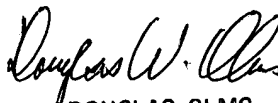

Any inquiry concerning this communication or earlier
communications from the examiner should be directed to Shick Hom
whose telephone number is (703) 305-4742.

Application/Control Number: 09/378,201
